Graphing $y = f'(x)$

$y = f(x)$

Find a function $g(x)$ so that $y = g'(x)$ looks like $y = f'(x)$.

Graphing y = f'(x)   8/9/25

y = f(x)

y = f'(x)

Find a function g(x) so that y = g'(x) looks like y = f'(x).

$$g(x) = f(x) + C$$
